

# Marcin Kostrzemiński

Full-stack developer

🌐 Toruń, Poland, CET

## About

I'm an independent and responsible full-stack developer proficient in Vue, Laravel, MySQL and related technologies. Programming is not just a profession but a hobby for me. I actively engage in side projects to continuously enhance my skills. I see myself as versatile, always eager to learn and adapt to new technologies. Recently I've been deep diving into React, Typescript, Next.js and Three.js.

## Work Experience

### Appworks Software House

2021 - now

Full-stack developer

During my time at Appworks, I managed to gain valuable experience, and deepen my knowledge related to web development. Over a span of more than two years, I actively participated in numerous projects, often as the main developer. Most of them are mentioned in the "Projects" section.

### Gmodstore Self-employed Remote

2017 - now

Developer / Content creator

I successfully developed and sold paid modifications for the popular game Garry's Mod, enhancing my proficiency in complex programming and gaining a solid understanding of the basics of 3D graphics. I created solutions that continue to be utilized by numerous server owners, demonstrating their ongoing value. Despite the niche nature of this endeavor, I managed to raise over \$20,000, showcasing the impact of my work on the gaming community.

## Education

### Nicolaus Copernicus University in Toruń

2019 - 2022

Engineering degree in information technology

## Skills

JavaScript TypeScript Vue React PHP/Laravel Next.js Three.js Lua JQuery
